CONTENTS

SECTION 1 ECOLOGY

W. Beck: 8
Investigation of the interactions between pine and beech in two-layer mixed stands using methods of tree-ring research

J. Block, V.N. Magda, D.V. Ovtchinnikov, A.V. Kirdyanov and U. Treter: 17
Spatial differences and temporal patterns of ring-width and density chronologies of the mountain forests of northern Central Asia

J. Bolli, A. Rigling and H. Bugmann: 24
Regeneration dynamics of Norway spruce (Picea abies L.) on a subalpine meadow near the treeline in Sedrun, Kt. Graubünden, Switzerland

C. Dittmar: 31
Contributions to the ecology of common beech as derived from tree-ring analyses

M. Pelfini, M. Santilli, M. Maggiolini, M. Orlandi and M. Barsanti: 41
The effects of the opening of a construction site on high-mountain tree vegetation

P. Weber, H. Bugmann and A. Rigling: 48
Differences in drought response of Pinus sylvestris L. and Quercus pubescens Willd. in the Swiss Rhône valley

SECTION 2 GEOMORPHOLOGY

A. Foetzki, M.J. Jonsson, M. Kalberer, H. Simon and T. Lundström: 54
Interaction between trees and natural hazards in subalpine spruce forests

M. Krabisch and H. Strunk: 58
Dendrogeomorphological research on thermokarst depressions in Western Siberia

D. Ciszewski and I. Malik: 63
Examples of valley and riverbed form dating by means of tree rings (Mala Panew meandering river, southern Poland)

M. Pelfini, M. Santilli and C. Merlini: 70
Determination of the erosion rate of escarpments at the debris-flow fan toe
SECTION 3  CLIMATOLOGY

D. Friedrichs and B. Neuwirth: 78
A spatial high resolved climate reconstruction from recent and historical tree-ring
data in the Rheinische Schiefergebirge since AD 1500

I. Heinrich: 85
Dendroclimatology of Toona ciliata in Australia

M. Schaub, K.F. Kaiser and B. Kromer: 96
Late glacial tree-ring chronologies - A high resolution archive of the past

SECTION 4  ISOTOPES

T. Boettger, Y. Kononov and M. Friedrich: 104
New stable isotope and dendrochronological studies of the 1000 years pine (Pinus
sylvestris L.) tree-ring chronology at the upper timberline in the Khibiny Low
Mountains, Kola Peninsula, North-Western Russia

Stable isotope ratios in late wood of Picea abies from Engadine

J. Grießinger, A. Bräuning and G.H. Schleser: 117
Isotope studies along a high-elevation transect on the Tibetan Plateau

R. Wagner, T. Boettger, I. Boeren and M. Friedrich: 124
Stable isotope ratios in tree rings of living Scots pine near Reichwalde opencast
mine in Lusatia (East Germany)

SECTION 5  METHODS

T. Barrelet, U. Krähenbühl and A. Ulrich: 130
Quantification of sulphur in Picea abies by LA-ICPMS

A. Beliakov: 138
Dendroindication of synchronous trends in productivity (middle-taiga of Arkhangelsk
region, Russia)

U. Büntgen, J. Esper, D.C. Frank, K. Treydte, M. Schmidhalter,
K. Niccolussi and M. Seifert: 141
The effect of power transformation on RCS – evidence from three millennial-length
alpine chronologies
**P. Duncker and H. Spiecker:**
Compression wood formation and pith eccentricity in Picea abies L. depending on selected site-related factors: Detection of compression wood by its spectral properties in reflected light

**J. König, B. Günther and C.T. Bues:**
New multivariate cross-correlation analysis

**S. Rickebusch:**
Tree rings as a calibration tool for dynamic forest models

**List of participants**
TRACE 2004 Conference, April 22nd – 24th 2004, WSL Birmensdorf, Switzerland
