Hydration and dehydration at the tropical tropopause

Cornelius Schiller
Hydration and dehydration at the tropical tropopause

Cornelius Schiller
Content

Abstract / Kurzfassung

1 Introduction
  1.1 Changes of stratospheric water concentrations 1
  1.2 Water transport across the tropical tropopause 2
  1.3 Freeze-drying at the tropical tropopause 3
  1.4 Scope of this work 4

2 Measurement of water in the upper troposphere and lower stratosphere 5
  2.1 The Fast In-situ Stratospheric Hygrometer 5
  2.2 Calibration of FISH 6
  2.3 Field comparison of FISH with other hygrometers 8
  2.4 The AquaVIT laboratory comparison experiment 10

3 Tropical aircraft missions 13

4 Water in the tropical tropopause layer 17
  4.1 Vertical profiles of H2O 17
  4.2 Dehydration at the tropical tropopause 20
    4.2.1 Saturation history 21
    4.2.2 Tropical regions of dehydration 22
    4.2.3 Reconstruction of water with HALOE climatological data 24
  4.3 Moistening by deep convection 27
  4.4 Model-observation-based studies of the TTL structure 29

5 Ice clouds and saturation at the tropical tropopause 33
  5.1 Ice water content and hydration/dehydration potential of cirrus particles 33
    5.1.1 Observation of specific cirrus 33
    5.1.2 Climatology of the ice water content 35
  5.2 Ice supersaturation and cirrus clouds 38
  5.3 Does HNO3 matter? 41

6 Conclusions and outlook 43
